Summary

Senior Data Engineer with 3 years of experience designing robust, event-driven ETL/ELT pipelines and autonomous AI data architectures on GCP. Proven expertise in BigQuery, Terraform, dbt, Airflow, and Python to automate infrastructure and power business decisions at scale. Google Cloud Certified ACE. Full-stack background enables an end-to-end perspective on building scalable, self-healing data solutions.

Experience

Senior Data Engineer (Promoted Apr 2026) Jul 2023 – Present

Ingram Micro, Chennai, India

- Architected scalable, event-driven ETL/ELT pipelines on GCP using BigQuery, Cloud Composer (Airflow), Cloud Functions, and Pub/Sub to automate end-to-end data ingestion and transformation workflows for the XVantage initiative.
- Engineered Python and SQL data scripts and optimized complex queries, significantly improving pipeline run-time efficiency and ensuring downstream data integrity.
- Designed reliable data pipelines that surface structured datasets into Looker, enabling accurate stakeholder reporting.
- Reduced manual data pipeline creation effort by **80%** through automation, ensuring early project delivery.
- **Awards:** Supernova Excellence Award & Rock Star Award (2025), Dashing Debut Award (2024).

Full-Stack Developer (Intern) Sep 2021 – Dec 2021

DevTown, Chennai, India

- Developed responsive front-end components and designed RESTful APIs using Node.js, Express, and MongoDB.
- Practiced Git-based version control and CI/CD pipeline workflows within a remote Agile development team.

Projects

Sentinel-Forge: Autonomous Agentic Data Engineering Platform

GCP, Vertex AI (Gemini), BigQuery, Terraform, dbt, Cloud Functions, Pub/Sub

- Engineered a self-healing ingestion platform using a tiered multi-agent architecture to dynamically detect schema drift.
- Automated the synthesis of Terraform (HCL) and dbt pipeline code, submitting validated PRs directly to GitHub.
- Implemented custom API resilience wrappers with exponential backoff and jitter to handle GCP quota limits.

Nexus: Centralized Data Hub

BigQuery, dbt, Infrastructure as Code, AI Agents

- Architected an end-to-end centralized data hub integrating dbt, BigQuery, and AI agents using Infrastructure as Code.

JobTrackr Enterprise

Python, SQL, React, Tailwind CSS, Cloud Architecture

- Engineered an enterprise-grade job application tracking system to centralize and manage large volumes of application data.
- Designed a high-quality "Deep Glass" UI leveraging glassmorphism principles and integrated automated reminder features.

Technical Skills

Cloud & Infrastructure: GCP, Terraform, Cloud Composer (Airflow), Cloud Functions, Pub/Sub, Cloud Storage, Vertex AI

Data Engineering: BigQuery, dbt, ETL/ELT Architecture, Data Modeling, Data Warehousing, Agentic AI Systems

Languages & Tools: Python, SQL, JavaScript, TypeScript, Git, REST APIs, Node.js, Looker, Power BI, Jira

Certifications & Engagement

Google Cloud Certified Associate Cloud Engineer (ACE) Jan 2026 – Exp. Jan 2029

Professional Events: Participant at DevFest 2025 (GDG Chennai) 2025

Additional Courses: Data Engineering Foundations, PostgreSQL Essential Training, Power BI A-Z

Education

Bachelor of Engineering, Electronics & Communication Engineering Jun 2019 – May 2023

Jerusalem College of Engineering, Chennai CGPA: **9.57 / 10.0** *Best Outgoing Student 2023*

Languages

English (Full Professional Proficiency) Tamil (Native)
